

Jai Nayar| Timeless Motor Group | 2006 M3

Biography:

Jai Nayar's favorite latin quote is *Audaces Fortuna Juvat* and his choices related to automotive customization reflect that. He's customized several cars and the results just keep getting better and better. His first foray into customization was a 2000 Honda Accord which did well at car shows and gained him positive attention from the Tuner community. Due to the lack of aftermarket support for his Accord he came to a turning point, keep modifying the Accord and deal with the risk of a failed transmission or move onto another platform. The writing was on the wall, the Accord was retired and shiny new BMW M3 Convertible was parked in the garage. There was a lot of negative feedback related to the purchase of a convertible for his next project but Jai persisted with his endeavors. Mod after mod six years passed by and the car went from docile to beast! The comments quickly changed from "ugh convertible, really" to "I hate convertibles, but I love yours!" Not quite the success most would seek but Jai's bold plan for his car stands tall amongst all the negativity. Jai continues to build his M3 and enjoys working with his sponsors and team to get to the next level. His one piece of advice for other tuners out there is to be bold and never quit at what you love doing no matter what adversity presents itself

Jai Nayar

Modifications

Engine

Gen 6 HKS Active Autowerke Supercharger w/intercooler
Active Autowerke Gen IV Headers,
HKS SSQV4 Blow off Valve
Vornsteiner 1x1 Engine Cover
